Care Sheet

Dawn Redwood - Metasequia glyptostrobides

Origin: China

General info

Deciduous tree that can grow 100'. Can be keep indoor or outdoor

Over Wintering

Indoor Sun and place on humidity tray or mist daily. If Kept outdoors during winter months so that they can experience a dormancy or rest period. During this period, your bonsai should be protected from drying winds and extreme cold conditions. This can be achieved by utilizing cold frames, window wells, enclosed unheated rooms, shed or garage with windows, or mulched beds. The bonsai should be checked regularly for water when temps are above freezing.

Lighting

Outdoor partial to full Sun, Indoor half day or better sun

Watering

Trees like to be keep moist, not drought tolerant. Use humidity tray or mist indoors. When you water make sure you completely wet all the soil in the pot every time you water. Don't pour in a little water every day.

Feeding

Spring thru fall. You can use house plant or nursery fertilizers. Follow the label for rates and application times.

Training

Heavy pruning in spring and pinch new growth rest of season

Repotting

Every spring before new growth cut roots back 25%
